# Da Fon Fabric #TreatOurEarthBetter

Da Fon over years has always adhered to  
"Functional Fabric Developer" business purposes.

We are make-to-order knitted fabric manufacturer from Taiwan. We optimize technology and innovation to provide performance knit and fashion sustainable knit. We partner up with Oeko-Tex certified mills and guarantee to provide harmless performance fabric and share our qualities through collections of **iHEAT®** / **iCOOL®** / **iFAB®** / **Eco-Friendly**

# What We Can Provide

Capability / Production

Integrate with innovative materials and customize development, specification to satisfy client's enquiry.

Over 20 years experience, providing the best service and quality-driven products through Made in Taiwan's production and our technology.

Throughout the rethink and reuse process, we design fabric to considerably reduce the harmful impact to our environment.

# Materials

---

Da Fon emphasize the versatility created from both natural and synthetic fibers and launched functional and sustainable collections.

iHEAT® is designed to create heating insulation and ensures a regulated temperature for improved comfort.

iCOOL® adopts advantages of both natural fibers and man-made fibers. Combining versatile structural designs, iCOOL® enhances cooling properties by upgrading the moisture management.

iFAB® includes Moisture Management, Stretch, UV protection, and Antimicrobial / Odor Control categories. We have developed the fabric by utilize functional yarns and statistics support.

# Eco-Friendly

In response to green textile, we partner up with certified mills and apply the concept of "functional + eco-friendly materials" to create an innovative sustainable textile.

We maintain comfort and function and minimize wastage and pollution to achieve sustainability and put effort into our motherland.

Recyclable

Biodegradable
