Global Operations – China staff zones

Our China facility staff areas offer spacious, modern, functional and comfortable zones

Pro-Stretch HCM Vietnam facility

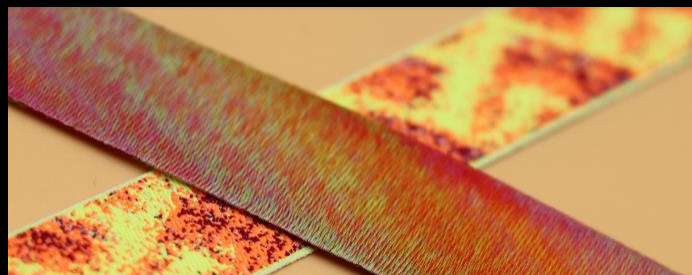

**Total
Area:
approx.
5,000 sq.m**

Product Innovations – Mechanical Stretch | Superstretch

- Pro-Stretch patented technology has been extensively developed, and enables rigid tapes/labels to be converted into mechanical stretch products WITHOUT USING CHEMICALS OR LYCRA. This process removes all shrinkage whilst giving 5%-12% stretch.
- The stretch process eliminates puckering and is applied to the garment using the same method as a traditional rigid tape, and is a permanent stretch.
- Our ground-breaking Super Stretch tape has approximately 20% stretch which is only slightly less than an elastic quality but without the shrinkage.

Product Innovations – Elastics | Knitted Trims | Embellishments

- Pro-Stretch can supply a wide range of Elastics, Knitted tapes, labels and tabs for our brands.
- We offer FREE development with competitive pricing and quality solutions whatever your needs

Elastics
