

Monochrome

Mackintosh Inside™ Technology

Axroma® is a fabric manufacturer fully committed to produce weather resist performance fabrics for indoor and outdoor living.

Its breakthrough patented technology, Mackintosh Inside™ enable the most environmental Olefin fiber to become rain and water resistant fabrics that permit your patio furniture quick dry under varying weather conditions. Mackintosh Inside™ Olefin yarn embodies the forever repellency that also repel most household stains in addition to mastering the moisture.

Axroma® is firstly presenting complete color line of Monochrome, all-purpose solid textures, by Mackintosh Inside™ technology. It combines needed performances and essential qualities of a beautiful fabric that functions across diverse applications.

Material: PFC free, Mackintosh Inside™ Olefin 

Weight: 250gsm

Colorfastness to Light: ISO 105-B04 Grade 7-8

Abrasion: ISO 12947-2 20,000 cycles Grade 4

Pilling: ISO 1294502, 15,000 cycles Grade 4-5

Hydrostatic Pressure: 320mm

Rain Test Method: AATCC 35 (Standard 1.0g) : 0.1g Pass

UV standard 801: Pass
