

# release natural comfort

Even before putting them on, *drirelease* fabrics instill a sense of comfort just knowing the benefits are natural and inherent — using no chemical performance treatments. The engineered blend of fibers optimizes the wicking, drying, soft feel and comfort of all fabrics, naturally.

Unique *drirelease* technology lets you move more comfortably. Our blends utilize multi-denier and multi-staple length fibers that accelerate the movement of moisture through to the outside of the garment and provide a natural aesthetic that is unmatched among performance textiles.

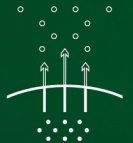

*drirelease* is available in a wide range of classic and fashion-forward blends including; comfortable classic cotton, Merino wool that never feels damp, machine washable silk, easy-care natural linen, soft and smooth Lyocell, high hemp performance, Naia™ fashion luxury, E.C.O. (Environmentally Correct Origins) with BCI, organic cotton, recycled polyester — and even customized blends to meet your specific needs.

As a global technology company and pioneer in performance and comfort textiles solutions, *drirelease* is trusted by the world's leading brands from sportswear to fashion. We're literally part of the best functional fabrics in today's marketplace.

It is our promise that the natural performance of *drirelease* will keep wearers fresh, dry and comfortable for whatever the day has in store. Visit us at [drirelease.com](http://drirelease.com)

# natural technology that performs

## INHERENT ECO-FRIENDLY PERFORMANCE

*drirelease* fabrics offer an engineered blend of multi denier, multi staple length synthetic, hydrophobic (water repelling) fibers combined with natural, hydrophilic (water absorbing) fibers. The built-in combination efficiently pulls moisture and perspiration away from the skin and pushes it to the exterior of the fabric where it can evaporate quickly, without using any kind of chemicals. *drirelease* will not wash out over time because it is not a surface application, making it permanent and eco-friendly.
