

| TEGEA |

ELASTICITY
COMPRESSION
AND TIGHTNESS
IN ONE SINGLE
PRODUCT.

ABOUT

FROM RAW MATERIAL
TO PRODUCTION.
WE ARE SUPPLIERS,
PRODUCERS BUT ABOVE
ALL WE ARE **PARTNERS.**

We constantly invest in research and development of new solutions to meet the most demanding requirements and improve athletic performance.

WHAT?

**TEGEA, TECHNOLOGY
AND CUSTOMIZATION
FOR YOUR BUSINESS**

A new product has been added to Marc's catalogue from the combination of **Areo** and **Comfort Grip** technology.

An **elastic band** capable of guaranteeing the perfect fit by adapting to the movements of the muscle combined with a **silicone cover** that guarantees the sock's hold.

CUSTOMISE THE ELASTIC BAND

There are no limits.

We guarantee maximum visibility even in low light conditions thanks to the **Re-Light** technology. The **Subli Print** process allows the elastic band to be customised with continuous double-sided printing.

PLUS FOR YOU
AND YOUR CUSTOMERS

FOR YOU

- ✓ Reduction of production and stock times
- ✓ Reduction of production waste
- ✓ Product ready for delivery

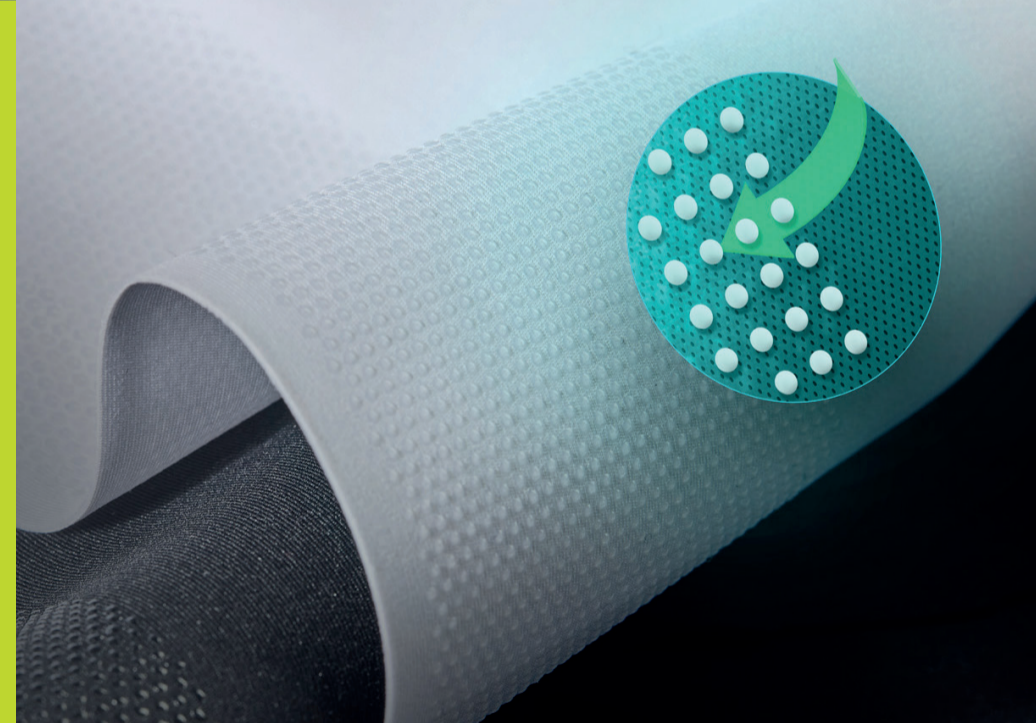

FOR YOUR CUSTOMERS

- ✓ Promotes aerodynamics
- ✓ Homogeneous compression
- ✓ Keeps up with trends thanks to endless customisations
- ✓ Elastic band and hypoallergenic silicone

Made from recycled yarn.

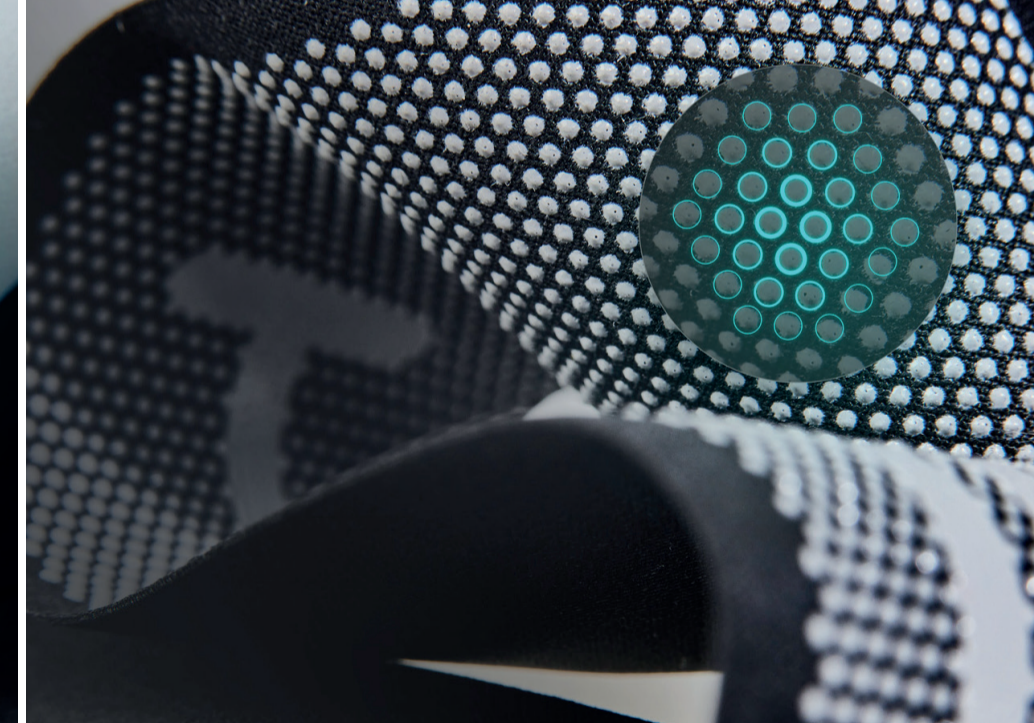

WHY NOT?

**TECHNOLOGY AERO:
AERODYNAMICS AND TIGHTNESS**

An innovative solution that combines the concept of tightness **aerodynamics** in one seamless product. In order to guarantee the **tightness** of the garments, the silicone is injected directly into the fabrics, which are particularly suited to live cutting, penetrating deeply.

Constant and uniform compression over the whole muscle in both tension and relaxation phases.

**TECHNOLOGY COMFORT GRIP:
MAXIMUM GRIP WITHOUT HINDERING MOVEMENT**

Comfort Grip technology combines a **braking function** with **oxygenation** to guarantee maximum freedom of movement.

The new chequered silicone distribution **guarantees** correct circulation and oxygenation of the capillary vessels and muscles, avoiding bottlenecks. Capillaries and muscles, avoiding constrictions.
