PFC-FREE
Ultra-Durable
Water Repellent
フッ素なしの超撥水

SUNNY SPECIAL DYEING & FINISHING CO., LTD.
www.sunnytex.com.tw

It's never an easy task to have the best of both worlds, especially when it comes to sustainability and making technical fabrics. At Sunnytek, we take pride in our ever evolving workmanship in technical finishings and strive toward the highest sustainability in manufacturing process. Solapel™ is a perfect example of a green product by utilizing technology most effectively. Solapel™ does not only elevate the performance and durability of water repellency extensively, we also believe it minimizes contamination of fluorocarbon into our environment and extend the lifetime of garments.

従来、環境保護とテクノロジは一緒に存在できないと言わされたが、特に生地の中では両方とも持つことは難しいと言われた。弊社はこういう話題の中では研究し、テクノロジだけではなく、エコにも持つ生地を開発することを始め、Solapel™と言う商品を誕生した。

現在、撥水はアウトドアだけではなく、日常にとても重要な機能である。染色工場としてのわれわれでは、良いな撥水機能を使って、フッ素は環境の中で汚染を最小限に抑え、服の寿命を延ばすと考えて開発した。

FEATURES

SUPERIOR LAUNDRY DURABILITY

Solapel™'s water repellency still performs effectively after 120 times washing which equals 24 hours continuously laundering.

HIGH VERSATILITY

Solapel™ is highly versatile as the superior washing durability allows the technology to be applied on not only outdoor wear but also everyday clothing.

ECO FRIENDLY

Solapel™ minimizes contamination of fluorocarbon into the environment by remaining most of DWR chemicals on textile after laundering. Also the longer it works, the longer you can wear it!

SOFT TOUCH AND COMFORTABLE

Solapel™ is soft touch and breathable while providing the ultimate protection from water.

ABRASION ENDURANCE

Solapel™'s water repellency after 5000 cycles in abrasion resistant testing remains effectively, 70% at initial and 70% after 50 washes.

TEST テスト

		Solapel™	Conventional DWR 一般撥水
Spray Rating 撥水試験 AATCC 22	After HL20 20回洗濯	90%	80%
	After HL50 50回洗濯	90%	50-70%
	After HL120 120回洗濯	70%	0-50%
Rainwear 雨 AATCC 35	Initial 洗濯前	PASS	FAIL
	Average water absorption 水吸収率	6.4%	26.6%
	Average visual 視覚率	grade 4 (formation of large drops) (水の広さ)	grade 3 (drops adhere to parts of the specimen) (氷玉が少し付けてること)
	Average wetting to underside 裏面の濡れ率	NO	YES
Bundesmann ブンデスマント Rain-Shower 降雨試験 ISO 9865	Average penetration 浸透率	0 ml	90 ml
