

In time of ecological catastrophe and resource shortage ,  
and COVID-19 spreading . We are tired to handle the ordeals .  
Taking a break with hiking and far from the civilization.  
Waiking on lichens which gaia In order to preserve the ground .  
Purify our soul by lichens soft touching.

Observe the appearances and capabilities of the lichens ,and adopting its unique structural feature and texture . We created "Like Lichen" .

**Warm**

**Quick dry**

**Breathability**

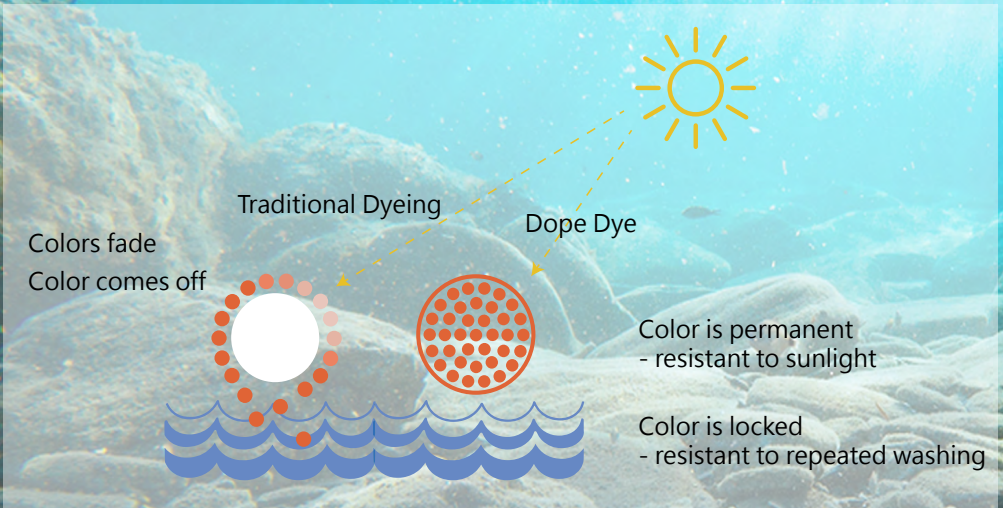

The unique Terry loop design provides a special air-barrier layer. The holes & vents provide breathability and Quick dry .

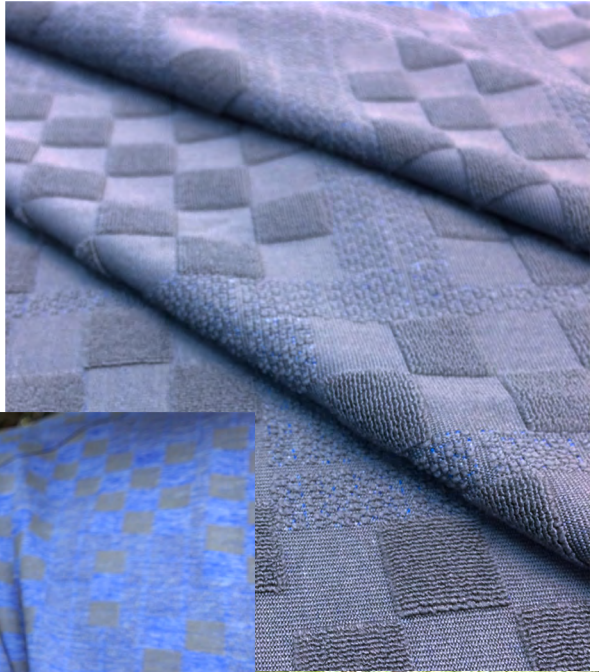

Not only care about land, but also having ocean

Prevented the release of plastic fibers during secondary processing.

Used environmental friendly recycled dope dyed yarn, reduced chemical dye stuff usage.

We create more added value , added graphene to our “Like Lichen” . This is one of the best material application this century ,it has electric conductivity, heat conductivity, high optical density and masking effect.

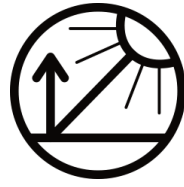

Graphene gives us the following advantages: Far infrared ray - boosts circulation · Antistatic · Antibacterial · UV-resistant.

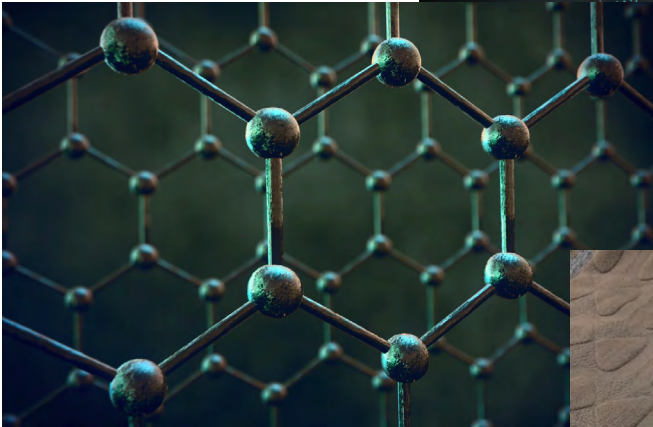

Antistatic

Antibacterial

UV-resistant

Promoted Blood Circulation

Men-Chuen cherishes every opportunity to learn from the earth. Through introspection, we look seriously into the impact of environmental exploitation. Therefore, through the development of every new product.

We strive to deliver products that are more friendly to the earth.  
Every little step counts.  
This is also Men-Chuen' s cooperating vision Sustainable growth with  
people-oriented.
