

Why choose Kinetech™ Brand?

What we do

We design and manufacture innovative stretch woven fabrics for high-performance sportswear. The product range focuses mainly on the demands of aerobic sports such as swimming, triathlon cycling and running.

Why we do it

Our payoff is our Mission: Enhancing Kienetic performance. Making fabrics that help enhance performance of the human body engaged in high level sports activities.

Who we are

Kinetech™ project has its roots in the textile manufacturing culture of TAIANA, a family company. We are a young team, enthusiastic about innovation, technology and sports. You can find us taking part in competitions to personally test what we create in the laboratory.

When we started

1933

TAIANA was established in 1933. The use of elastic fibers since their first appearance on the market, and a love for research into textiles have always been in the company's DNA. Kinetech™ division was created in 2005 which commits all its resources to the creation of Ergogenic fabrics for sports.

Where we are located

Our company is located in Como northern part of Italy. Great place for making fabrics and doing sports 😊 in the Como's lake area.

Brand's plus:
