

POLYGIENE ODORCRUNCH™

NATURAL ANTI-ODOR TECHNOLOGY MADE FROM SWEDISH SAND (SILICA) AND FILTERED RIVER WATER

POLYGIENE ODORCRUNCH™

- Scandinavian Outdoor Award winner 2019
- Performance Days Munich 2021 – 100% Jury Selection product
- Bluesign® approved – Bluesign logo
- Oeko-Tex® Eco Passport certified and registered under REACH
- Not a Biocide and isn't liable under BPR regulations
- Zero toxicity. Safe for everyone and the environment

Polygiene®
STAYS FRESH

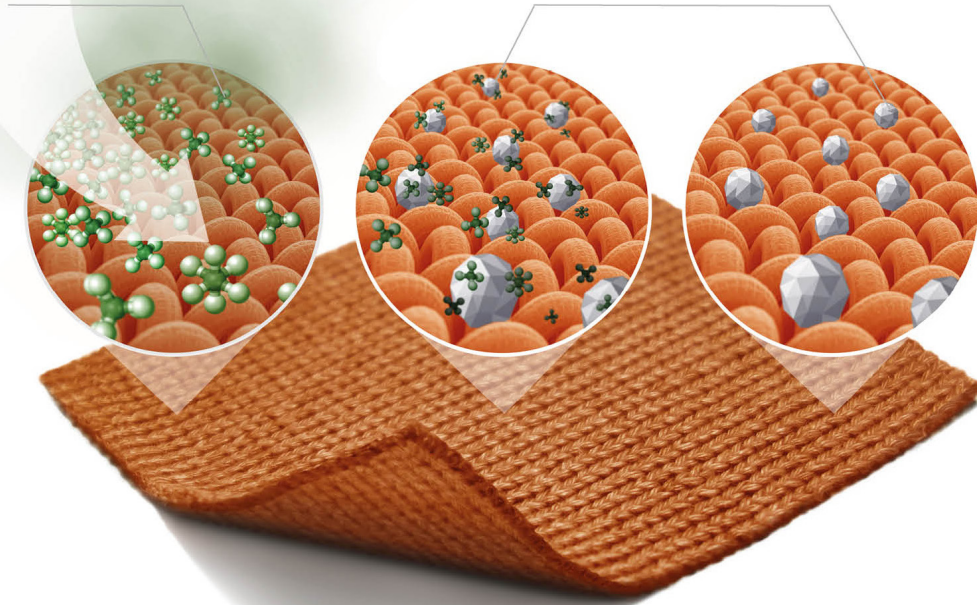

POLYGIENE ODORCRUNCH™

WITHOUT POLYGIENE ODORCRUNCH

ODOR MOLECULES (SMOKE, FOOD, BODY ODORS ETC) SETTLE IN MATERIAL

WITH POLYGIENE ODORCRUNCH

ODORCRUNCH TECHNOLOGY PARTICLES CAPTURE AND ELIMINATE ODORS

HOW DOES ODOR CRUNCH WORK?

- Works on a number of different odors including cooking fumes, smoke, body odor and other environmental fumes and odors
- The OdorCrunch silica particles capture the offensive smelling particles and once they have been absorbed, they are catalytically cracked and broken down and the offensive odor is permanently eliminated
- Efficacy lasts as long as the garment or the product

By eliminating odors, the need to wash garments is reduced resulting in: Less use of water, less energy, less detergents and less shedding of microfibers into the water system. This also saves you money and gives you extra time to do the things you love instead of doing laundry
