PERFORMANCE FABRICS

## ITTTAI IN 4 POINTS

### 1 Our mission

Since the beginning our goal is to improve the products using our know how and technologies. For this reason in this years we have put all our efforts to innovate products and production processes working side by side with the needs of our customers.

### 2 Research & development

The continuous evolution in research and the knowledge of the materials to combined in order to improve the features of the final product, is what has made us so innovative in offering high-tech products, using the best membranes available and the lightest and best performing fabrics creating new complexes with better performances and greater comfort.

### 3 Execution Strategy

The creation of a laboratory, equipped with all the best analysis tools, has allowed us to have a continuous control of the production lines guaranteeing a high quality standard. With the lab what makes the real difference is on the development stage of the new products that thanks to the analysis tools we can verify at any time the new product's performances and choose to modify the parameters or the components until obtaining the desired result.

### 4 Our customer is a partner

Create a new article or improve it, means dialoguing with our customer and being able to create the appropriate characteristics to meet the required requirements. Knowing the needs of the market means investing our resources in the right direction.
