## OUR PHILOSOPHY

Tamurakoma & Co., Ltd. has been involved in the planning, production and sale of textile products required since Meiji era for over 120 years when Tamura Komajiro first established a Western-style trading company „Kandaya Tamura Shop“ in 1879.

For about 100 years until the Showa era, we have challenged new business with the intention of „transformation“ and „creation“ centered on materials, mainly in final products since the Heisei era.

What we always wanted to do is to utilize the cultivated trust and corporate capabilities, „to realize a rich lifestyle and contribute to improving living culture through manufacturing.“ In order to strengthen the dissemination of such tradition and advanced Tamurakoma brand worldwide, we have created a new corporate mark.

Based on the traditional color that inherits the history of our company, the new corporate mark expresses TAMURAKOMA ,s alphabet [O] as the earth and expresses the advanced nature as a global company. In addition, I thought that the trust of spinning with society, business partners and employees on the three central lines will become a bridge to the world.

Together with this new symbol, we aim to become a global company that provides products that satisfy our customers. I look forward to your further guidance and encouragement in the future.

Representative Director and President

Hiroyuki Ueki
