# Our Core Values

## Innovation

Hyperbola is always at the forefront of market trends and continuously researching new innovations and technologies.

## R&D and Quality Control

Hyperbola invests strongly in R&D and earns its reputation for outstanding unique developments, and with full inspection at each step of the production process, we ensure that only the best quality products are approved

## Vertical Integration

Hyperbola excels at its integration capabilities, we provide customizations for our clients all the way from fabric selection and style design to garment production.

## Customized Products

Hyperbola provides customers with the flexibility to customize products to best fit their needs—always paying close attention to and understanding the customer's voice.

# Sustainable Production

Caring for the Earth is at the heart of Hyperbola's culture, we continuously make effort to reduce our carbon footage and work towards **100% eco-production**.

We have adopted recycled yarn, recycled film, as well as eco-friendly finishing application such as non-fluoride water repellency. We are certified for:

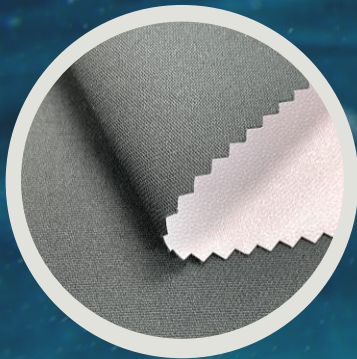

# Product Range

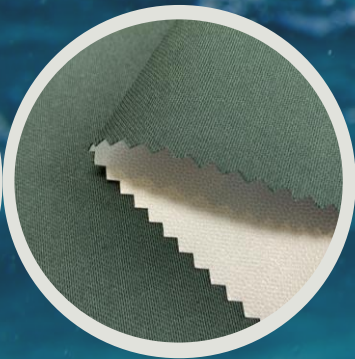

Hyperbola's fabric offerings range from polyester to wool, where special finishing techniques can be applied to whatever fabric content to achieve different performance levels.

Performance lamination/treatments that allow water repellency, breathability and more
