NY²LIFE

RECYCLED-RECYCLABLE

Ny2Life RECYCLED-RECYCLABLE zippers are entirely made of Econyl® regenerated Nylon.

Developed by Aquafil, Econyl® regenerated Nylon is a product that can help to close the loop. Made of waste from landfills and oceans, it is recycled right back to its original purity. It has the potential to be recycled infinitely without ever losing its quality. The goal is that once the products containing Econyl® regenerated Nylon are no longer useful to customers they can go back into the regeneration process in an endless loop towards a sustainable future.

ECONYL®

Made with 100% Regenerated Nylon

 **NYGUARD**
NOT JUST ANY ZIPPER

NY²LIFE
RECYCLED-RECYCLABLE

DESIGNED to be RECYCLED

All the Ny2Life zippers are mono-material. Tape, Teeth, Elements, Slider and Puller of Ny2Life RECYCLED-RECYCLABLE zippers are entirely made of Econyl® regenerated Nylon.

Combining it with Econyl® Fabrics it is possible to create mono-material garments easy to be recycled for a real circular economy.

Ny2Life is the coherent zipper in your sustainable project, to make it easy to:

- RECYCLE after end use
- CERTIFY by third party
- COMMUNICATE to final customers

REpapa/cyclable RE

NAPAPIJRI
NAPAPIJRI

Warm, snowproof, water-resistant, 100% recyclable: Infinity combines Napapijri's most iconic silhouette, the anorak, with its mission of designing a circular future for fashion. How? Infinity is built using one material, which allows for an easier recycling process: its filling and trims are made from Nylon 6, while its fabric is made from ECONYL® Regenerated Nylon. The use of one material allows for an easier recycling process where fibres are upcycled without losing any of their original characteristic or quality. So when the jacket reaches the end of its life, it is only the beginning.

OCEAN IS MY HOME COLLECTION BY SAVE THE DUCK

The sea-inspired colour palette reflects the ocean-saving design as the jacket is made from ECONYL® recycled nylon coming 100% from fishing nets and other nylon waste materials.
