- Direct and indirect holdings in UAE, US, Sri Lanka, China, Hong Kong, Bahrain and Azerbaijan
- Strategic partnerships with Groups from UAE, South Africa & Malaysia.
- Has played an important role in the industrial development of Pakistan

## Group Introduction

- Formally Started out in 1951, today Nishat Group is standing tall in the corporate sector with total assets around US\$ 10 billion, is one of the largest business conglomerates in the country.
- Originally a textile mill, with several strategic expansions and alliances, Nishat Group had become a business powerhouse by 1970. The 80s and 90s saw the group further expand and strengthen itself.

## Introduction Cont'd

- Today the Group owns some of the biggest players in financial services, insurance, cement, textile, paper, hospitality, aviation, power, agriculture and dairy. Several of these businesses are listed on Pakistani stock markets. Some of them, such as Nishat hospitality, cement and finance, also have substantial markets in other countries.
- The true strength of the Group, however, lies in its absolute dedication to quality and discipline in every venture.

A photograph of a textile spinning machine, likely a ring spinning machine, with a golden brushstroke background. The machine is shown in a perspective view, with rows of spindles and bobbins extending into the distance. The lighting is dramatic, with a strong golden glow on the right side, creating a sense of depth and texture. The background is a dark, textured surface with golden brushstrokes, giving it an artistic, painterly feel.

*Spinning*

# Spinning

Spindles **227,800**

Production: **5,400 tons per month**

Product range

- Ring spun,
- Comb,
- Carder,
- Core spun,
- Dyed,
- Multi-ply

applicable for various fabrication processes from natural and synthetic fibres.

The image features a central illustration of a loom, rendered in a golden, glowing style. The loom's frame and threads are depicted with a soft, ethereal light, contrasting sharply with the dark, textured background. The background is composed of broad, expressive brushstrokes in shades of dark brown and black, with streaks of gold and yellow. The overall composition is dynamic and artistic, suggesting a sense of movement and craftsmanship. In the bottom left corner, the word "Weaving" is written in a flowing, cursive script, matching the golden color of the loom.

*Weaving*

# Weaving

- Nishat Mills Weaving department comprises of **805** modern Air Jet and Rappier Looms
- Per month Production Capacity is approximately **11 Million Meters**

# Weaving

- Nishat Mills Weaving unit has state of the art looms / machines
- Picanol Omni plus Summum,
- Toyota 710 / 810,
- Tsudakoma professional air jet / doobby looms

Capacity of 22 lines with 65 machines each

*Nishat  
Linen*

# Nishat Linen

Linen is one of the most worn fabrics in Pakistan. With the fabric being a part of every woman's wardrobe, Mills its premium linen brand, Nishat Linen, a name that has always lived up to its promise to offer new designs and trends every season.

Catering to the immense, and growing, market for high quality linen in Pakistan Nishat Linen has opened over 50 outlets all over the country making it one of the most vastly spread domestic brands.

It has been a front-runner in the linen industry with eye-catching rich designs, which appeal to all while maintaining the quality that is associated with the brand.

Nishat Linen has not only set its mark in Pakistan but has also spread itself around the globe. With its footprints in the Middle East, Europe and North America Nishat Linen's vision is to reach out to even wider markets all across the world.

*Captive  
Power  
Generation*

# Captive Power Generation

Nishat Mills has a total of 37 manufacturing units, each specializing in its own particular product range. The companies' own Captive Power Generation has addressed these units' need for uninterrupted power supply: each facility under Nishat Mills is 100% independent of state provided electricity.

The Captive Power plants have combined Heat and Power Plants with a total capacity of 110 MWH of electricity. These plants run primarily on coal but also have the flexibility to run on gas, diesel furnace oil and steam. The facilities are using Wartsilla, Caterpillar, Cummins, Daihatsu, Jenbacher and Mark engines for power generation

With these plants running on readily available material, Nishat has been able to hold true to its promise of doing its best to facilitate its operations.

*Corporate  
Social  
Responsibility*

# Corporate Social Responsibility

Nishat Mills believes in giving back to the society and the environment. Steps taken include adopting processes that go beyond international requirements to protect the environment and sponsoring the education of students.

Among the efforts that have made towards reducing the company's carbon footprint is its policy to utilize sunlight instead of electricity for lighting for 8 working hours every day, one complete shift. The facilities have openings in the ceiling and strategically placed reflectors that enhance sunlight and completely replace artificial lighting during daylight hours.

# Corporate Social Responsibility

Nishat Mills is also using powerless exhaust mechanisms. The pressure of steam being released from various processes powers the exhaust mechanism instead of electricity or conventional fuels, making the process very eco-friendly.

# Corporate Social Responsibility

As part of the company's concern for the environment, it has also equipped its facilities with water treatment plants that process polluted water and make it once more safe for personal and commercial use. Clean water is also drained back into the soil to maintain the water table.

Nishat Mills takes pride in the fact that it is Green.

# Corporate Social Responsibility

And recognizing the most prized resource of any economy to be the next generation, Nishat Mills has also provide land and complete running finances for schools.

The company is also working towards increasing diversity and steps are being taken towards equal employment opportunity for gender etc.

# Corporate Social Responsibility

Some CSR achievements are:

Energy saving oh more than 200,500 kwh/year

Free medical/diabetic camps for employees of  
and other personnel within the vicinity of the  
Mills

More than 40 disabled persons are in  
employment at Nishat

# Certifications
