We have imported machinery from Taiwan to dye fabrics or pre-wash them.

FABRIC FINISHING SETUP

- The Taiwanese Stenter Machine is 39m long.
- The Fabric is passed through this machine at very temperatures.
- The width of Spandex fabric is fixed on this machine.
- Functions:
 - *Fixes colours on the fabric*
 - *Wicking, Sun Protection, Anti-microbial, Insect Repellent finishes are applied to the fabric at this final stage.*

FABRIC FINISHES

Type of Finish	Information
Wicking	<ul style="list-style-type: none"><input type="checkbox"/> Also known as quick dry finish.<input type="checkbox"/> Involves usage of special additives on fabric for functional finishing.<input type="checkbox"/> Gives absorbent, breathable and quick-drying characteristics.
Anti-Microbial	<ul style="list-style-type: none"><input type="checkbox"/> Ionic silver used to inhibit microbial growth.<input type="checkbox"/> Multiple independent test show that there is high efficacy against harmful micro-organisms.<input type="checkbox"/> Protects against SARS Co Virus if amino moulding compounds are used.
Sun (UV-B) protection	<ul style="list-style-type: none"><input type="checkbox"/> -Makes the fabric anti-UV radiation and does not affect the physical properties of it.<input type="checkbox"/> -Easy to handle, non-toxic, safe to use, no stimulation to the skin.
