The combination of classic two colors makes the style more dynamic, and the contrasting colors are more fashionable, making people feel strong vitality. In the design, the details of the splicing or wrapping can be used to make the style more wearable.

At the same time, with the rise of outdoor sports style, functional materials tend to waterproof and windproof, the design can be used in the same color or contrast color splicing, enrich the visual perception.

# RAINBOW COLOR GRADIENT

The rainbow is a reflection of the rain. It is a rich holiday color. Whether it is applied to clothes or other decorations, it can convey a rainbow of joy. Create a dreamlike holiday mood, arouse people's love and yearning for a better life.
